Q.2

What kind of value does Daikin provide to society?

Through our business activities, we provide healthy and comfortable daily lives while at the same time contributing to energy efficiency and the reduction of greenhouse gases.

Preventing air pollution and protecting health

Comfortable air that contributes to higher productivity and improved health

Energy savings through the use of highly efficient energy

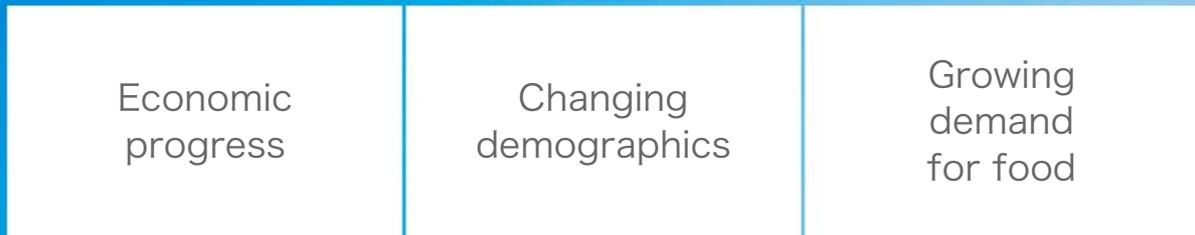

Reduced greenhouse gas emissions through the development of refrigerants with low global warming potential

What does Daikin think about today's social problems?

Based on issues that arise with our changing global society, we respond to the increasing number of new needs and to people's changing awareness.

↓

Increasing number of new needs, people's changing awareness

Q.4

What is Daikin doing about these problems?

We are creating new value that contributes to solutions and we are helping realize the sustainable development of society through our business.

Daikin's CSR

- Environment
- New value creation
- Customer satisfaction
- Human resources

Fundamental CSR

Grow sustainably in response to society's requests

- Corporate governance
- Respect for human rights
- Supply chain management
- Stakeholder engagement
- Communities

Social value created by Daikin

Value Creation for the Earth

We respond to the growing air conditioner demand related to issues such as climate change and economic advancement. At the same time, by using electricity efficiently and spreading the use of refrigerants with low global warming potential, we help reduce greenhouse gas emissions and prevent the acceleration of global warming.

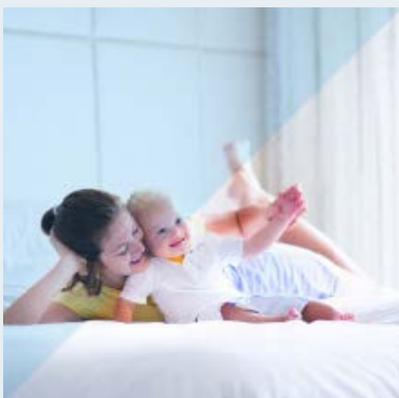

Sustainable development goals (SDGs) targeted

Value Creation for Cities

We create spaces that respond to the various needs of both industrialized and developing countries. In addition, through city-wide air conditioning management methods such as zero-energy buildings, which achieve a net energy balance of zero, we are helping create comfortable and energy-efficient urban settings.

Sustainable development goals (SDGs) targeted

Value Creation for Health and Comfort

We are striving to reduce the amounts of hazardous chemicals in the atmosphere in order to contribute to both better living environments and economic development. In addition, by helping establish an efficient cold chain, we contribute to the provision of food and pharmaceuticals.

Sustainable development goals (SDGs) targeted
