Environment: Efforts to Reduce Environmental Impact

- Returnable pallets will be adopted for imported parts.

- All lighting in the plant (including its offices) will be LED lighting.

Environment: Environmental Communication Examples

- All new employees and contractors working for Daikin will receive education of ISO 14001.

- Thorough sorting of waste will be encouraged.

Customers Satisfaction: Efforts to Improve Product Quality

- A training center will be opened in the plant for training installers and service engineers.

Human Resources: Efforts to Occupational Safety and Health

- Issues related to occupational health and safety will be reported at monthly meeting of the Occupational Safety and Health Committee for their elimination.

Monthly patrol "Safety/5S" will be conducted to find and eliminate problems.

- Fire drill and first aid training

Communities: Environmental Protection Activities

■ We will collect garbages and clean the neighborhood with companies in Thang Long Industrial Park II for promotion of environment protection.

Communities: Support for Educational Activities

■ We will welcome third-grade pupils from PCK Elementary Schools to provide them with an introductory lesson about our business.

Communities: Other Regional Activities

■ We donated generators and air conditioners to the waste treatment plant in Disu Ward.

■ We will provide gifts to poor families, wounded soldiers in YM AT Ward, and people affected by Agent Orange in the Vietnamese traditional New Year's Day.
