Relief Support for Hurricane Harvey in the United States

In response to Hurricane Harvey, which recently hit the United States, Daikin Industries, Ltd. announces its decision to donate an additional 300,000 U.S. dollars for relief to the people affected by Harvey and support for restoration of the disaster areas.

Immediately following the disaster, Goodman Global Group, Inc. (Headquarters: Houston, Texas), a Daikin subsidiary in the United States, donated 200,000 U.S. dollars as a contribution to relief efforts. In consideration of the situation in the affected areas, Daikin Industries decided to make this additional donation at this time as its own company contribution to relief efforts for the damage caused by Hurricane Harvey. This donation brings the total contribution of the Daikin Group to 500,000 U.S. dollars.

It is our sincerest hope for the earliest possible recovery and restoration of the disaster areas.
